

**Item P12-1438**

**CoverMe Hole Covers**

CoverMe hole covers are safe, efficient and affordable. Stay OSHA compliant in seconds with these adjustable, load-bearing, reusable hole covers. OSHA requires that all hole covers larger than 2' on a construction site be covered with a load-bearing material that is pre-marked with the word "hole". Each employee on a walking/working surface shall be protected from tripping in or stepping into or through holes by covers. CoverMe is replacing the old way of covering holes with a sheet of plywood, 2"x4", screws, power tools and spray paint. CoverMe advantages include no tools required, load-bearing (human), reusable/recyclable, water-resistant stripping, pre-marked "Hole", knockout hole for cords, beveled edge to reduce tripping hazards and adjustable locking clips. To install a CoverMe hole cover is 95% more time effective than the old way of using plywood hole covers.

Item	Description	Attributes
12-1438		<b>Size:</b> Standard 2-6" <b>Shape:</b> Round
12-1439		<b>Size:</b> Large 6-12" <b>Shape:</b> Round
