

**Item P12-2242**

**DrizAir® LGR 2800i Dehumidifier**

Remove a lot of water and move less machine. Dri-Eaz built the DrizAir LGR 2800i dehumidifier with more drying power in the most convenient size for water damage restoration. Removes up to 25 gallons a day. Uses low grain refrigerant with patented heat pipe technology. Hot-gas bypass feature for quick defrosting. Features rugged rotomolded housing and electronic touchpad controls. Also has semi-pneumatic wheels for easy jobsite mobility and a built-in ring for easy attachment of ducting.
