

Item P10-1170

Electric Core Drill Motors

Colony offers a wide variety of high quality, multi-speed drill motors that can be adapted to the several models of Drill Stands. All motors have a built in water swivel that directs the flow of water to the drilling edge of the diamond bits keeping diamonds cool and cutting at top efficiency. Milwaukee motors with shear pins protect gears and motor against overload, allowing the machine to operate at a safe torque. Motors with slip clutch also protect gears and motor from overload and are set to specifications at the factory with no adjustment necessary. Please note that the Core Bore CB748 replaces the popular Black & Decker/DeWalt motor.

Item	Description	Attributes
10-1170		Motor: Milwaukee Amps: 15 RPM Low/High: 375/750 Safety Override: Shear Pin Suggested Diameter in Med. Aggregate: 5"-8" 2 1/2"-5" Tool Weight: 26 lbs.
10-1172		Motor: Milwaukee Amps: 20 RPM Low/High: 450/900 Safety Override: Shear Pin Suggested Diameter in Med. Aggregate: 6"-10" 2"-6" Tool Weight: 24 lbs.
10-1176		Motor: Milwaukee Amps: 20 RPM Low/High: 450/900 Safety Override: Slip Clutch Suggested Diameter in Med. Aggregate: 6"-10" 2"-6" Tool Weight: 24 lbs.

*Replaces Black & Decker/DeWalt model
