

Item P14-2274

Group Lock Box with Wall Mounting Bracket

Group Lock Box with Wall Mounting Bracket helps facilities manage the placement and movement of group lock boxes to protect people. The S3650 can be used wherever it's needed – mount the box using the bracket for routine, daily use; take it portable for remote lockouts; or move to a bracket in another area for large turnarounds. Secure the box to the bracket with the optional locking feature and prevent unwanted box removal from the wall. Easily monitor the status of group lockout at a glance with product features like the rewritable tags and clear, impact-resistant window. Despite its small size, this box has an internal capacity of 15 safety padlocks, allowing for greater protected padlock storage.
