

Item P10-2651

Husqvarna Cut-n-Break Saw

This saw can cut in stages through walls up to 16" thick. The first step is to make a cut up to 2-1/2" deep with fast cutting, twin 9" blades. The remaining central core is then easily broken off using the accompanying breaking tool. Finally, successive cuts can be made to reach up to 16" deep. The twin, specially-developed 9" blades provide high cutting speed and power. **The K760 Cut-n-Break features a 5 hp. X-Torq® gas engine, while the K3000 has a 100-120V, 2.4 hp. electric motor.**

Model #	(2) 9" General Purpose Cut-n-Break Blades
