

Item P13-0137

Hydro-Test Hydrostatic Tester

For testing piping systems, boilers, automatic sprinkler systems, fire hose and extinguisher tanks. Works best with water pressure feed, but will operate with gravity feed if water pressure is unavailable. Adjustable relief valve that can be set for any maximum pressure, glycerine filled pressure gauge, high pressure check valve, 7' electrical cord and a 10' high pressure hose. 16 gauge steel box housing. Portable and easy to use. Requires 120 volts.

Item	Description	Attributes
13-0137		Maximum P.S.I.: 350 Gallons Per Minute: 3 HP: 3/4 Weight (lbs.): 64
13-0139		Maximum P.S.I.: 1,000 Gallons Per Minute: 2 HP: 1.5 Weight (lbs.): 92

Electric hydrostatic testers are available for pressures up to 3,000 p.s.i. Please call for a complete listing of models available.
