

Item P26-0484
LC Endothermic Firestop Sealant

SpecSeal® LC Sealant is a latex-based, high solids firestop compound. This material, when properly installed, will effectively seal penetration openings and joints against the spread of fire, smoke, hot gasses and water. It is engineered to adhere well to virtually all construction surfaces and may be applied using a standard caulk gun, a trowel or putty knife. It dries to form a flexible shield against the propagation of fire. Its premium latex binder system is totally resistant to water and will not re-emulsify after drying. SpecSeal® LC Sealant is non-halogenated, contains no asbestos or inorganic fibers.
