

Item P21-0738
Low Voltage Mounting Bracket

Provides a fast, easy way to install low voltage Class 2 communication outlets during rough-in construction without having to use an electrical box. Makes fish wiring easier. A bendable flap provides a termination plate for conduit. Automatically positions for 1/2" or 5/8" drywall. May be installed to the front or the side of a metal or wood stud. Eliminates bulges in the drywall caused by plaster rings. Fastens with dry wall or self tapping screws.
