

Item P26-0348

Metacaulk Cast-in-Place Device

Provides through floor penetration firestop protection for both plastic and metal pipes and all types of cabling. Highly intumescent firestop. Fills the void of the CID opening, blocking the flame/smoke from infiltrating through the floor. Tested and approved to ASTM E814 (UL 1479) and is compliant with the International Building Code (IBC) and other building code authorities. Heavy-duty, crush-resistant design.

Item	Description	Attributes
