

Item P26-0491

Metacaulk® Firestop Wrap Strip

Metacaulk® Wrap Strip is a flexible strip of highly intumescent firestop material used primarily for plastic and insulated pipe applications. When exposed to heat, it expands and forms a strong char to seal off the penetration and prevent the passage of flames and hot gases. Easy to apply – simply wrap the required number of strips around penetrating item and push into annular space, or as system design requires.
