

Item P10-4065

Milwaukee M12™ Compact Flood Light

Can be used in virtually any workspace with its compact size and integrated hanging features like its strong magnets, spring loaded clamp, key hole hanger, and wire hanger. This 12V compact flood light is capable of lighting up a large workspace for extended periods of time, as it provides 1,000 lumens of high definition light output in its high mode, 400 lumens in medium and 200 lumens of output in low mode. It uses high quality LED with a neutral white color and a high color rendering index paired with a Milwaukee designed reflector to produce an even beam pattern. The M12 Compact Flood Light has an impact and chemical resistant lens able to withstand the toughest of jobsite conditions. (Battery sold separately)
