

Item P10-4073

Milwaukee M12™ LED Metal Flashlight

Its powerful LED produces 800 Lumens of high definition light output, and it can cast a beam beyond 375 yards. The sliding head allows users to adjust their beam pattern from a flood to a spot effortlessly, and it features three output modes for high, low or strobe use. The body is built from machined 6000 Series Aluminum with a type II anodized finish and can handle anything it may encounter through years of professional use. **Kit includes: (1) M12 battery and charger.**
