

Item P12-9988

Moldex® 2300N Series Respirators

Same features as the Moldex® 2200N Series Respirators described above, but with an exhale valve that lets workers breathe easy and stay cool. By reducing this hot air build up, safety glasses will be less likely to fog up. The 2300N Series also has flame retardants added to the shell to help reduce flammability, making this disposable suitable for most welding applications. Available 20 per box, or in a reusable "Respirator Locker" that stores 5 masks.

Item	Description	Attributes
12-9988	2300N Respirator Locker (5 masks)	Size: Medium
12-9984	2300N Respirators (Box of 10)	Size: Small
12-9987	2300N Respirators (Box of 10)	Size: Medium
