**Nilfisk GM80 Hepa Filter Vacuum**

Lightweight and portable, the Nilfisk GM80 is a versatile machine providing the durability and performance required by dust control professionals. Featuring a 3-1/4 gallon tank capacity, it can be used in both portable and stationary applications. It features a standard multi-stage filtration system with a paper dust bag, main filter, microfilter and HEPA exhaust filter. In the first stage of separation, a disposable paper bag captures the bulk of collected debris. Extra large main filter ensures a steady, even airflow which extends filter life and eliminates premature clogging. The optional microfilter, a final step in pre-filtration protects the motor and acts as a barrier to even bacteria-size particles.

HEPA filter ensures that 99.97% of all ultra fine particles, toxic and nuisance, are retained - down to and including 0.3 microns. Motor thermal protection device prevents overheating caused by failure to keep filters clean or by accidental blockage in a nozzle or hose. Ball-joint coupling give 360° freedom of movement without hoses splitting and cracking, while eliminating knots. Heavy-duty trolley adds mobility. Glides over all surfaces.

Specifications	
Power	1100 watts
Air Flow	80 cfm
Paper Bag Capacity	2.25 gallons
Tank Capacity	3.25 gallons
Waterlift, max	84 inches of H2O

Item	Description	Attributes
25-0250	Nilfisk GM80 HEPA Filter Vacuum	
25-0251	Replacement Micro Polyester Filter	
25-0252	Replacement Cotton Main Filter	
25-0253	Replacement HEPA Filter Cartridge	
25-0254	30' Grounded Power Cord	
25-0255	3" Adjustable Dust Brush	
25-0256	Plastic Crevis Nozzle (32 mm)	
25-0257	Replacement Trolley Assembly	
25-0258	Combination Floor Nozzle
