

Item P23-0003

AC/DC Voltage Tester

Measures AC/DC voltage and polarity. Over voltage warning gives user visual notification that voltage levels have exceeded 1000V AC/ 380V DC. Autohold automatically activates when tester is removed from voltage reading. Continuity test and single probe detection of live conductors for added flexibility. Safe, non-contact voltage detection. Visual and audible continuity. Includes test leads, (2) AAA batteries and carry case. Manufactured by Greenlee.

Voltage Measurement	19 to 1000VAC, 5 to 1000VDC
Frequency Response	0 to 70 Hz
Continuity Verification	0 to 50k
GFCI	7.5mA at 120 VAC, +/- 10%
Measurement Category	CAT IV, 600 V, CAT III, 1000 V
