

**Item P11-6590**

**PLS 6R Laser with Rechargeable Battery Pack**

Plumb, level, and square with one tool. The PLS 6 is a professional self-leveling combination point and cross line laser level that includes vertical and horizontal modes with lines and points combined. Great for metal or wood stud installation, general layout, square alignment, or finish carpentry. PLS 6 features a pendulum lock to secure the laser during transport or if dropped. Accurate to 1/8" at 30 ft. **Includes rechargeable battery pack, floor stand, magnetic L-bracket, and UB9 wall and ceiling bracket for fast, easy overhang and center line measurements. The system includes the SLD laser line detector for use in bright lighting, long distances, or outdoors.** Weight: 1.3 lbs.
