

**Item P11-6594**

**PLS180 Cross Line Laser**

The PLS 180 is a professional self-leveling cross line laser level equipped for multiple applications including wall construction, acoustic ceiling installation, tile installation, residential and commercial construction. PLS 180 features a pendulum lock to secure the laser during transport or if dropped. Accurate to 1/8" at 30 ft. **Kit includes: rechargeable battery pack, floor stand, magnetic L-bracket, and UB9 wall and ceiling bracket for fast, easy overhang and center line measurements.**

| Item    | Description                                     | Attributes |
|---------|---|------------|
| 11-6505 | Red Laser Beam (Bare Tool)                      |            |
| 11-6594 | Red Laser Beam with Rechargeable Battery Pack   |            |
| 11-6595 | Green Laser Beam (Bare Tool)                    |            |
| 11-6596 | Green Laser Beam with Rechargeable Battery Pack |            |

*(While the visibility of the PLS 180 Green is significantly better than a traditional red beam, the power consumption will also be significantly higher. Power consumption will vary dependent on climate and usage. For best performance use strong rechargeable batteries.)*
