**PRO-SERIES Indirect Fired Forced Air Heater**

Heatstar PRO-SERIES Indirect Fired Heater are highly efficient devices that provide large volume of 100% clean, dry and fume free warm air. Powerful internal fans along with a heat exchanger allow the placement of this heater outdoors while delivering heated air up to 50' through ducting at 1,060 CFM, thereby eliminating exposure to fumes inside. Either place the heater outside the space and duct the warm air in or for a fuel savings you can place the heater in the space to be heated and vent the exhaust out. Optional thermostat available for constant temperature control. Automatic electric safety and control devices are standard equipment. Uses: Kerosene, Diesel 1# or 2#, Fuel Oil, Jet A fuel.

Item	Description	Attributes
19-1464	122,000 BTU Indirect Fired Forced Air Heater	<b>Hot Air Flow:</b> 1,060 CFM
19-1465	180,000 BTU Indirect Fired Forced Air Heater	<b>Hot Air Flow:</b> 1,060 CFM
19-1466	14" Single Duct Adapter	
19-1467	14" x 25" Flex Duct	
19-1977	32' Remote Analog Thermostat
