

Item P12-2291

Aire Guardian Mobile Containment Cube

Aire Guardian Mobile Containment Cube is made from a tough reinforced PVC material that makes it extremely durable, but also light in weight. It is an effective tool for negative pressure containment when working in ceilings and wall cavities. It features zippered entry/exit doors on 3 sides, and a zippered top for full access above. Double thickness floor for added durability. Zippered openings on 2 sides for wall cavity access. Large clear plastic windows on all 4 sides for enhanced visibility. Other features include a clear pouch for documents, pass through opening with removable cover, and portable air scrubber and HEPA vacuum ports. Large enough to accommodate a worker on a 6 ft. or 8 ft. ladder. Includes 400 lb. capacity aluminum transport cart.
