

Item P29-1069

Self-Feed Bits

Self-feeding replaceable double end screw point makes these bits fast and easy to use giving you clean smooth holes without pressure. Screw points have a coarse thread at one end and a fine thread at the other to give you a choice of 2 feeding speeds. 7/16" diameter shank has 3 milled flats for use on portable electric or pneumatic drills and stationary boring machines. For extra length, use Bit Extensions below.
