Specseal® Latex Intumescent Sealant

SpecSeal® Series SSS Sealant is a latex based firestop compound. Effectively seals penetration openings against the spread of fire, smoke, toxic gasses and water. Features two-stage intumescent technology. Aggressively expands to quickly close off voids left by the burning or melting of combustible materials. Single grade sealant has excellent caulking properties, and may be pumped, caulked (standard cartridge or bulk loaded), knifed or troweled. Has excellent adhesion properties and contains no solvents that could affect plastic pipes or cable coatings. UL classified and FM approved. Color: Red.

Model #		SSS-100
Item	Description	Attributes
