

Item P12-4320

Ultra-DrainGuard® Catch Basin Inserts

Keeps sediment and other pollutants from entering the water system. Helps comply with NPDES, 40 CFR 122.26 (1999) when used as Best Management Practice in Storm Water Pollution Prevention Plans. Designed for practical use in construction sites for capturing eroded soil and wind-blown debris. Can also be used in industrial facilities for keeping oil and other contaminants from entering storm drains. Removes up to .87 gallons of hydrocarbons. Comes with four handling straps made of nylon for easy installation and removal. Sold individually or in packages of 10.
