

Item P10-9840

Weka Hand Held Core Drill

Can be used hand held or rig mounted for maximum versatility. The 3 speed drill has a powerful 14 amp motor capable of drilling up to 6" diameter holes. A friction safety clutch protects the operator in case the bit jams. Built in water swivel cools the diamond bit and prevents dust. Uses standard 1 1/4"-7 and 5/8"-11 threaded diamond core bits; yet we highly recommend using [Hand Held Core Bits](#) since they will drill faster and are 40% lighter in weight. Hand held hole capacity: 3/8" - 3". Rig mounted hole capacity: 3/8" - 6". **Standard equipment includes 5/8"-11" adapter for core bits 1 1/2" or less, in line GFCI, thermal overload switch and 360° rotatable side handle.** Three speed drill: 580/1400/2900 RPM. Total weight: 15 lbs.
