

Item P18-0080

Z.R.C. Cold Galvanizing Compound

95% pure zinc metal content liquid compound stops rust and creepage on any surface, any size. Recognized by independent tests to be the equivalent of hot-dip galvanizing when applied in a dry film thickness of 3 mils. Renews worn or broken hot-dip galvanized surfaces. Effective on ferrous and nonferrous metals. Can be applied by brush, spray or roller. Non-toxic. No mixing necessary. Ready for use directly from container. Unlimited applications.
