

Item P14-0857

ZipWall® Spring Loaded Poles

- Spring loaded pole provides constant pressure between the floor and ceiling. Also allows the pole to be lifted so the plastic sheeting can be tucked underneath, making a tight barrier top to bottom.
- Teather connects plate to head eliminating the problem of losing it when attaching plastic between head and plate.
- Non-Skid Plate holds the pole firmly in place at the ceiling without leaving any marks.
- ZipWall® Poles can also be use to support crown molding, kitchen cabinets, ceiling sheet rock etc. for installation.
- ZipWall® SLPs™ are sold 2 per box.
