

**Item P11-6665**

**Bosch 12V Max Connected Thermal Camera**

Featuring a large illuminated color display, it delivers a 160x120 thermal graphic image accurate to  $\pm 3^{\circ}$  C. The thermal graphic image features more than 19,000 measurement points for precision, showing hot and cold spots, the temperature at the center and an adjustable temperature scale. The integrated visual camera records actual images, so the user can document the work area visually as well as thermally. It can store up to 500 images. The user can then transfer the thermal documentation to a device with Bluetooth® or WiFi hotspot with GTC software. **Includes: 12V Max Lithium-Ion battery, 12V Max charger, USB cable, and soft pouch.**
