

Item P11-7155

Bosch Rotary Laser Detector

Laser receiver increases rotary laser detection to up to 650' with ease and accuracy. The dual-sided LCD display offers easy viewing on both sides of the receiver while the built-in magnets securely attaches to metal surfaces for use at greater distances. A LCD arrow display and selectable audio signal give clear on-grade position to ensure accuracy of +/-1 mm fine (+/-3 mm coarse). **Includes: mounting bracket and 9V battery.**
