

**Item P14-1041**

**Bucket Of Safe Tie**

A complete fall protection system for both commercial and residential roofers. Each kit contains the following:

- 5 Gallon Bucket
- Universal Fit Harness
- 50 ft. Vertical Lifeline Assembly
- Available with choice of 5 Snappy Anchors or 1 Temper Anchor.

Snappy anchors provide a safe tie-off point for temporary work where a permanent anchorage point is not necessary. Snappy anchors can be easily formed by hand to fit the shape of any pitch roof you may be working on. Once the job is complete, Snappy needs to be bent over and the roofing material installed directly over the destroyed anchor. Meets 5,000 lb. load rating for fall arrest use. Only one worker can be tied off to the Snappy Anchor.

Temper Anchors are tough, long-lasting, reusable and fit to the pitch of the most difficult roof. Heavy-duty construction allows the anchors to be installed and removed at the completion of the job. These anchors must be installed over a truss and can be fastened with either screws or duplex nails, and provide a fall arrest attachment point for one worker. Meets 5,000 lb. load rating for fall arrest use.
