KASK HARD HATS

The KASK design is widely used throughout Europe. Advantages of this style hard hat are:

- 1. Safety-** Like a bicycle helmet, the Kask Hard Hat will not fall off once it is secured. Twofold advantage: (1) In the case of a fall, the worker is still protected (2) Prevents the hard hat from falling and injuring someone else and (3) Workers have protection front, top, side and rear.
- 2. Longevity-** Current ANSI regulations on most hard hats require replacement of suspension every year and replacement of hard hat every 5 years. Kask's hard hat suspension does NOT have to be replaced and the helmet has a 10-year compliance life.
- 3. Comfort-** The Kask is a better fitting hard hat period. Therefore, more comfortable.
