

Item P12-1433
Energizer TAC 300 LED Tactical Flashlight

Exclusive cam-driven beam changes from spot to flood with a turn of the head. Durable metal construction reduces oxidation and enhances conductivity. The LED flashlight is available with a 3W luxeon bulb (no replacement bulb available, but lasts for 10,000 hours.) The standard flashlight is available with a krypton bulb (spare lamp included in tail). Replacement krypton lamp available. Batteries and nylon holster included with both lights. Turn your standard mini Mag-Lite® into an LED light by purchasing a conversion kit. Kit includes LEDs and replacement tail cap with on/off pushbutton. Made in USA.
