

Item P14-1700

Fiberglass Step Ladder- Type 1AA - 375 lbs.

Meets ANSI Type IAA 375 lb. standard. Strong molded boot helps to protect the fiberglass rail and the thick rubber tread provides a secure, slip resistant footing. Inside spreader braces help keep braces from getting hooked or abused during transit. Each step features heavy duty gussets secured with large steel rivets. The bottom step has two pairs of steel gussets for even more strength. Wide back braces spaced on one foot intervals provide maximum stiffness and discourage unsafe climbing. Rugged, non-conductive structural molded top. Shox step supports offer enhanced impact absorption and better protection against damage.

Item	Description	Attributes
14-1700		Size: 4' Weight: 15 lbs.
14-1701		Size: 6' Weight: 22 lbs.
14-1702		Size: 8' Weight: 29 lbs.
