Item P12-1523

FirePlug® Mineral Fiber

A cost effective firestopping solution designed especially to fit irregular shaped voids in corrugated metal pan deck. FirePlug® is made from a high temperature mineral fiber product that installs quickly by eliminating the time consuming task of match-fitting the top edge of the drywall or masonry to the metal deck profile. FirePlug® eliminates expensive cutting in the field, and its smooth, flat surface allows consistent control of spray coating and/or caulk sealant thickness. Weight for each: 8 lbs.

Item	Description	Attributes
12-1523		Size: 3 1/2" x 1 1/2" x 4 1/2" x 48" Type: 1 Qty. Per Case: 45
