

Item P26-0290

Metacaulk Smoke and Acoustic Sealant

Metacaulk Smoke and Acoustic Sealant is high-grade acrylic latex sealant is designed to be used in interior applications to prevent the passage of smoke and impede the transfer of sound in non-fire rated assemblies. It may be used in vertical and horizontal assemblies in linear joints in walls or floors. It can also be installed around pipe, conduit, electrical cable, ventilation duct, electrical boxes and any other through or membrane penetration in a non-fire rated vertical or horizontal assembly. Metacaulk Smoke and Acoustic Sealant meets the requirements for LEED criteria under Environmental Air Quality and Regional Materials.
