

Item P16-8060

Milwaukee MX FUEL™ 14" Cut-Off Saw Kit

14" Capacity gives the ability to cut up to 5" depths in every application and finish the job with fewer passes. A 20mm/1" arbor adapter is included to maximize versatility and prevent wasted time searching for a compatible blade. An onboard water connection allows you to use the saw for both dry and wet applications. A universal quick connect hose ensures simple and effective wet cutting in concrete/masonry applications. The push button activation required 97% less effort than a recoil start by eliminating the repetitive motions of a pull start. Wheels on the front of the saw help create a straight, consistent cut with less strain. The XC406 Battery recharges in 90 Minutes. All MX FUEL™ batteries fit all MX FUEL™ Equipment. Kit includes: MX FUEL™ 14" CUT-OFF SAW, MX FUEL™ REDLITHIUM™ XC406 battery pack (MXFXC406), MX FUEL™ CHARGER (MXFC), Quick Connect Collar, Wrench, hex key and Contractor Bag.
