**Mortarman 120+ Portable Vertical Shaft Mixer**

The Mortarman 120+ is perfect for the 2-4 man construction crew. Eliminates the hassles of towing a mixer to a jobsite; the Mortarman 120+ can make a wheelbarrow of mortar, stucco, grout or dry pack cement every 3 minutes. In fact, the Mortarman 120+ mixers deliver so much mixing torque that the 120+ can out produce a 2 bag towable mixer when making dry pack cement. The Mortarman120+ fits through standard doorways. The mixing action is neat and controlled. The mud stays in the drum, and the mix discharge is equally clean. Mix indoors without making a mess. If the material being mixed starts to clump up or separate, no problem, just hit reverse for a few seconds...then back to forward. The ability to switch from forward to reverse ensures that all types of material mix well. 2 HP motor.
