

**Item P12-2277**

**Negative Air Machine**

Designed specifically for contractors doing renovation and demolition work inside buildings. Meets and exceeds EPA, OSHA, NEC and ANSI standards. Filter placement insures uninterrupted airflow and equal displacement of filtration. The heavy duty aluminum cabinet is airtight, thereby preventing leakage for uninterrupted filtration. The lock-in-place filter eliminates bypass of contaminated air. Comes with four heavy duty swivel casters (two are locking), for easy jobsite mobility. 12" Air inlet collars and 12" outlet collars (optional - not included with unit). Comes with all three filters.

Specifications		
Air Capacity		
Power		115 Volts, 60 Hz, 13 Amps
Dimensions		
Weight		160 lbs.
