

Item P13-0800

Pipe Seal Penetration Seals

A fast and economical way to seal piping and conduit in wall and floor penetrations. Installs in minutes and is designed as a permanent water-tight seal between the pipe and the hole through which it passes. It resists sunlight, ozone, water and a range of chemicals. It can withstand up to 20psi of pressure. Transfer of vibration and shock in a pipeline is greatly reduced by the rubber seal. Seals supplied in rubber EPDM with a temperature range of -40° to +250°. Other seal materials available such as; nitrile for oil and silicone for high temperature applications. Bolt material supplied is plated carbon steel or 316SS stainless steel. A variety of different pipe seal sizes are available for varying sizes of pipe. Call your colony representative to assist you in determining the correct size and quantity needed for your application. 10 Links per belt, sold by the piece. **Please note: Pipe seal can be used interchangeably with most other brands including Linkseal® and Inner Lynx®.**
