

Item P12-2204

PitchPro

Designed for sloped-roof asphalt shingle construction. The PitchPro is the perfect solution for both new and existing construction, and its low-profile installation makes it an excellent choice for finished roof tops. Its oversized connection point makes attaching and detaching easy and bind-free. Made from robust powder-coated steel, resists damage from repeated installations, and ensures the longest possible lifespan. Suitable for wood, metal, or concrete substrates. Color: gray.
