

**Item P11-6858**  
**PLS 3R Laser Tool**

This professional self-leveling three-point red and green laser level allows for fast, accurate layout of reference points and is excellent for steel stud framing, HVAC installation, electrical and residential construction. The PLS 3G green beam laser is up to three times brighter than the PLS 3R red beam, making it ideal for projects over longer distances or with lower lighting. Equipped with a pendulum lock, ensuring safe transport and the ability to lock the laser level in tilt mode. IP 54 rating to limit dust and water entry for years of operation on the job site. Kit includes floor stand and L-bracket for fast, easy overhang and centerline measurements.
