

**Item P99-0831**

**Pure110+™ Epoxy Injection Adhesive Anchoring System**

The Pure110+ is a two-component, high strength adhesive anchoring system. The system includes injection adhesive in plastic cartridges, mixing nozzles, dispensing tools and hole cleaning equipment. The Pure110+ is designed for bonding threaded rod and reinforcing bar hardware into drilled holes in concrete and masonry base materials. Pure110+ has the same bond strength at room temperature and at 110°F. Evaluated for installation and use in dry and wet holes, including water filled and underwater. Can be installed in a wide range of base material temperature. Conforms to requirements of ASTM C 881, Types I, II, IV and V, Grade 3, Classes B & C (also meets Type III except for elongation). Evaluated and qualified by an accredited independent testing laboratory for recognition in cracked and uncracked concrete including seismic and wind loading.

Item	Description	Attributes
