

Item P15-1612

Ramset XT540

The Ramset XT540 was specifically designed for heavy-duty interior & exterior applications. Driving 1-1/4" embedment for perimeter trace, fastening track and clips to structural steel and track to hard concrete. The XT540's combination of high power and durability make it perfect for demanding applications. Spring retrain front end, no manual resetting of the piston. Included: Safety Glasses, Spall Guard, Carry Case, two extra piston return springs.
