

Item P14-0494

Adjustable Cable Lockout

Infinitely adjustable for a secure fit every time. Integrated, single-piece safety hasp and cable for ease-of-use. Simply feed the cable end through the points to be locked out, then back through the lockout body. Cinch it tight to remove any slack with the patented locking feature. Ideal for both multiple circuit breaker panel and side-by-side gate valve lockouts. Tough, multi-stranded 5/32" (4 mm) diameter steel cable is insulated with a clear vinyl coating, and flexible to pass through virtually all lockout points. Tough, lightweight, dielectric Xenoy® thermoplastic body withstands chemicals; performs effectively in extreme conditions. Up to 4 workers can apply their personal safety locks. Red lockout color identifies the safety lockout application. Complete with high-visibility permanent safety labels (Eng., Fr.& Sp.) that can be written on to identify the responsible person, then erased for the next job.
