

Item P13-0054
Ridgid 238-P Powered Soil Pipe Cutter

Model 238-P Powered Soil Pipe Cutter cuts cast iron pipe quickly and easily in tight spaces. Cuts 8" diameter soil pipe when used with an impact driver (minimum 200 ft-lbs) or 4" manually. The 11.5" length, removable handle, low profile cutter wheels and compact design fits into tight places in both overhead and below grade applications. At 13.5 pounds mounting the tool in difficult places is easy. Articulating outward facing chain hooks lay on the pipe to simplify latching. Two directional operation allows scoring of the pipe for a clean cut.
