

Item P25-0586

Ridgid Vacuum Quick Connect Pump Accessory

An ideal tool to eliminate water without transporting the vacuum up and down stairs. Install the pump on the drain port of the vac and secure a standard garden hose to the pump. Run the hose vertically and out a window for liquid disposal. The pump secures to any RIDGID vac with a drain and enables the shop vacuum to pump 10 gallons of water per minute up to 40 ft. high.
