

Item P19-1033

Scaffold Wrap

Designed specifically as a scaffold enclosure, this product has several advantages over more traditional products such as reinforced polyethylene and scaffolding tarps. Since it is sized to fit both tube and fitting as well as modular scaffold systems, installation is fast and easy. Once installed properly using the recommended Scaffold Wrap Fasteners this product withstands wind and weather while retaining heat better than tarps or poly. Scaffold Wrap has a thickness of approximately 10 mil., with tear resistant reinforcing bands and openings pre-cut for fastener attachment. Its strong woven grid fabric provides unparalleled tensile strength. Meets City of Boston specifications for temporary enclosures. Color: White.

Item	Description	Attributes
19-1033		Roll Size: 7.6' x 100' Hole Locations For Fasteners: Every 12 inches Recommended # of Fasteners Per Roll: 100
19-1038		Roll Size: 13' x 100' Hole Locations For Fasteners: Every 4 inches Recommended # of Fasteners Per Roll: 250
