

Item P26-0282
SikaQuick® 1000

SikaQuick® 1000 is a one component, rapid hardening, early strength gaining, cementitious, patching material for concrete. Specially suited for hot weather applications when extended working time is required. Rapid hardening as defined by ASTM C-928. Epoxy coatings can be applied as early as 6 hrs. On site testing is recommended for verification. Please consult coatings manufacturer for recommendations. Freeze/thaw resistant. Easy to use, labor-saving material
