

Item P13-0034
Support Arm For Power Drive

Support Arm improves overall thread cutting operation of the 700. Provides the guide for straight threads and eliminates possibility of damage to spline end of die head by keeping power drive square to pipe. By taking torque and being clamped securely onto pipe or conduit, the Support Arm also contributes to a safer threading operation. Please note that die heads and dies for the 700 machine are sold separately.

Item	Description	Attributes
13-0010	Support Arm For 700	
13-0034	Steel Carrying Case
