

Item P12-0904

Ultra Cable Feeder

Takes much of the effort, time and cost out of the other end of the pull, where the cable first feeds off the reels. Using the reel configuration that is best suited for the job, the cable feeder is positioned between the reels and the conduit or cable tray. Simply prep your cable, and feed the cable(s) through the feeder. Variable speed knob adjusts the feed of the cable to match the pull. Accommodates cable up to 3 1/2" in diameter. Sets up easily and can be operated by one person. Optional foot switch is available. Speed: 4 - 36 feet per minute. Reel weight capacity: 25,000 lbs. Weighs 285 lbs. Dimensions: 41" x 27 1/2" x 37 1/2".
