

**Item P14-0335**  
**VersiShield® Guardrail System**

Allows erection of OSHA compliant guardrail systems on open edge concrete structures or wood stairs **without drilling**. VersiShield® has a unique clamping device that swivels into place at odd angles while locking securely onto the building structure. The system easily adjusts with the simple lift of a ring and tightens securely with one tension bolt. For use on deck and stair thickness up to 15".
