

Item P10-1119

Zantech Shroud for Metabo grinder

Dust containment shroud for masonry cutting and sawing. Innovative design provides increased visibility, accuracy, and maneuverability. A 1 1/4" depth of cut can be achieved with a 5" diameter blade. The easily removable hood cover makes for quick blade changes. The Zantech shroud is designed for any cutting application where dust containment is critical. When used with a high powered vacuum, it promotes a safer, cleaner job site. Perfect for interior renovation work and tuck pointing. **Please note: Zantech shroud is designed to fit Metabo 4 1/2" & 5" angle grinders only.**
